CLUED IN

I love your magazines. In the spirit of keeping up their generally excellent quality, I noticed a few glitches in the June issue. The solution diagram to Crossword 19 had the second and third letters of 24-Across transposed. More importantly, in Odd One Out on page 65, the answers to both entry #9 and entry #13 were incorrect. The former listed Lippizaner, Holstein, Clydesdale, and Hambletonian, with Holstein named the "odd one out." You claimed it is a type of cow while the others are horses. This couldn't be farther from the truth. Holstein, which is more properly known as Holsteiner, is indeed a breed of German warmblooded horse. I own one named Useful and he would be quite offended to know that he has been called a cow! Additionally, Hambletonian is also not a breed but the actual name of a specific equine who served as one of the progenitors of the Standardbred type. Check out Marguerite Henry's children's classic "Born to Trot." It includes a wonderful history of Rysdyk's Hambletonian as well as Rosalind, still one of the all-time greats. Lastly, entry #13 asked us to distinguish which one didn't belong in YMCA, NOW, UNESCO, and NATO. Your answer stated that YMCA should not be on that list because, unlike the others, it is not an acronym. Yet, YMCA stands for the Young Men's Christian Association. Surely, that's why the corresponding women's group is the YWCA. Despite these inconsistencies, you still have me as a fan!

J.W., via e-mail

Thank you for your thorough letter, J.W. We truly do appreciate all feedback (as well as your loyalty!). As you noted, the solution to Crossword 19 does seem to have two letters in the wrong positions. Here at Dell, we work hard to produce error-free publications. Each puzzle undergoes extensive proofreading, but occasionally a gaffe slips

through. We do regret any inconvenience this one caused you. Moreover, you're right in pointing out that Hambletonian is not an equine breed. After some research, we found that like you said, the name is recognized as that of a famous stallion's or, alternatively, the term used to describe an annual harness race for 3-year-old trotters. Furthermore, you were correct in your assertion that Holstein, while known primarily as a cow, is indeed a breed of horse, more commonly known as a Holsteiner. On the other hand, an acronym, by definition, is a set of characters that can be properly pronounced without simply listing its letters. For example, PETA and ASAP qualify, but CIA and PTA do not. It follows that YMCA also doesn't make the cut. Nevertheless, you were on the mark with most of your observations, which are very helpful to us editors!

We're still anxious to find out which special crosswords are your favorite(s) and why. This month we've included a Duplex, a Think-er's, and an Add-A-Fraction for you. Your comments may be edited for space and clarity, and we'll always withhold your name or use your initials if you wish. Please write, fax, or e-mail us at:

SKILL-O-GRAM

by Gary Maria

Each square above contains one part of a complete drawing. Using a pencil or pen, you are to copy exactly what you see into the diagram below. Use the letter-number combinations as a guide, and draw exactly what is in each box above into the corresponding box below. Start with A-7, drawing in the box where Row A and Column 7 intersect. Then draw in A-8, B-4, etc., and continue right through to the end. The result will be a finished drawing, as skillfully drawn as if by an artist.

The artist's drawing is shown on page 121.

TRIANGLE FILL-IN

The answers to the definitions below are all 3-letter words. Each answer is to be put into a triangle of the diagram so that it encircles its corresponding number, but it is up to you to decide whether it should be entered in a clockwise or counter-clockwise direction. As a help, where the corners of triangles touch, the letters are the same. The first word, OLD, has been entered to help you get started.

KRISS KROSS 1

SHAKESPEAREAN CHARACTERS

Kriss Kross puzzles are solved by fitting the words supplied with each puzzle into their proper places in the diagram. The words are in alphabetical order according to the number of letters. Some of the diagrams have a word or phrase inserted to start you off. The name entered into this diagram is "CASSANDRA." To proceed, look for the 4-letter entry beginning with "R." Continue in this manner until the puzzle is solved.

LADDERGRAMS

by Irene R. Hayes

First, write the word that fits the first definition into space 1. Then drop one letter and rearrange the remaining letters to form the answer to definition 2. Drop one more letter, rearrange, and get the answer to definition 3. Put the first dropped letter into the box to the left of space 1 and the other dropped letter into the box next to space 3. When you have correctly solved the puzzle, the dropped letters on the left and right, when read down, will spell out related words or a phrase.

Solutions are on page 125.

DUPLEX CROSSWORD

by Diane Baldwin

Follow the same procedure here as you do when solving crosswords, except that in this tricky puzzle you will, in many instances, have TWO letters of the defined word to write into one box. As a help you will find in parentheses, after each definition, the number of letters in the word that goes in the diagram. We have entered the answer to 1-Down as an example.

Solution is on page 121.

STOP AND GO MAZE

It has been twenty years since Ronald Reagan was President, Madonna launched her first tour, and "Amadeus" won an Academy Award for Best Picture. Beginning at "S" (start) at the top of the diagram, see if you can find your way to "F" (finish) at the bottom by moving only through the GOs. You may move left, right, up, down, but you may not move diagonally, nor may you cross through any of the NOs or retrace your own path. Our expert took three minutes to get through this memorable year — see if you can beat her time. Ready, set, GO!

CRYPTOQUIZZES

A Cryptoquiz is a group of related words in a simple substitution code — one set of letters has been substituted for the correct letters of the words in each group. The title and the example of each group will help you identify the words. Look for words that might reveal themselves by their distinctive spelling or by frequently used letters. When you have identified a word, knowing the letters will help you decode the other words in that group, because if A stands for T in one word, it will be the same throughout that group. Each group, though, has a different code.

QUOTATION PUZZLES

In each puzzle below, you are to fit the letters in each column into the boxes directly above them in order to form words. The letters may or may not go into the boxes in the same order in which they are given. It is up to you to decide which letter goes into which box above it. Once a letter is used, cross it off the bottom half of the diagram and do not use it again. A black square indicates the end of a word. When the diagrams have been filled in, you will be able to find the completed quotations by reading across the boxes.

CHARADES

In the puzzle below, each line contains a clue to a letter of the alphabet. These letters, in the given order, will spell out the last name of a well-known personality. The identity is also hinted at in the last sentence of the Charade.

Answer is on page 127.

My FIRST is in MASTER but not in SLAVE;
My SECOND is in RACKET but not in RAVE;
My THIRD is in DOUBLE but not in BOLD;
My FOURTH is in SINGLE but not in GOLD;
My FIFTH is in SERVE but not in CLUE.
My SIXTH is in BOUNCE but not in CUE.
My SEVENTH is in SEED but not in SORT.

My WHOLE's a U.S. sportsman whose name was made on the court.

LETTER SWITCH

Each of the nonsensical sentences below can be changed into a little truism by replacing one letter in each word with one of the letters listed in the parentheses following the sentence. Every word in each sentence must have one letter changed (including the 1-letter words "a" and "I"), but do not change the order of either the letters in the words or the words in the sentence. For example: I SWITCH ON TIRE (A, I, M, T) becomes A STITCH IN TIME — the four letters in parentheses having replaced the I, W, O, and R in the words of the nonsensical sentence. The letters in parentheses are in alphabetical order, which is not necessarily the order in which you will use them. Each letter in parentheses will be used only once.

Answers are on page 127.

LOGIC PROBLEM 1

DOGWARTS GHOSTS

by David Champlin

Dogwarts Academy for Witches and Warlocks has several resident ghosts, all of whom seem to be sad. Last week, between Monday and Friday, a young witch-in-training named Jo and four other current students each saw a different apparition in a different room of the school. Each ghost manifested his or her presence in a different way. No two appeared on the same day. From this information and the clues below, can you determine each student's ghost sighting, room, behavior, and day?

1. Both the ghost seen by Nigel (who didn't see the ghost that kept disappearing) and the ghost that appeared in the classroom (who wasn't seen by Lon) were female. One of these two ghosts appeared on Tuesday.
2. The five students involved are, in no particular order, Hermia, the one who saw Blubbery Betsy, the one who saw a ghost in the attic, the one who heard a ghost speaking, and the one who saw Friday's ghost.
3. Wailing Walt (who didn't float in mid-air) appeared to a student the day before the ghost seen by boy-wizard Terry, which appeared the day before the attic ghost.
4. The ghost that ran through objects appeared the day before Crying Carl, who appeared the day before the ghost in the storeroom.
5. The ghost in the library appeared the day before the one that glowed in the dark; Sobbing Sara appeared sometime before the ghost Lon saw. All four of these ghosts have haunted Dogwarts for over twenty years.
6. The boy who saw Melancholy Meg (who didn't glow or float) and the student who saw the ghost in the hall were both more intrigued than frightened.

Solution is on page 130.

If you care to use the chart below in solving this Problem, you do so by entering all information obtained from the clues using, perhaps, an X to indicate a definite "no" and a dot to show a definite "yes." Remember: Once you enter a definite "yes" (dot), place a "no" (X) in all the rest of the boxes in each row and column that contains the dot.

BULL'S-EYE LETTER

To solve this puzzle, add the **SAME** letter (the Bull's-Eye Letter) to each group of three letters in the diagram, then rearrange the letters in each group to form an everyday 4-letter word. Remember, the Bull's-Eye Letter must be the same letter for each group.

Answer is on page 127.

ALL FOURS

To solve All Fours, write the answer to each definition in the diagram, starting at its correspondingly numbered square. All of the answers are 4-letter words and should be entered in a clockwise direction. When completed correctly, the first, third, and fifth rows of the diagram will spell out a little truism.

Answer is on page 127.

THINK-INS

The idea of this puzzle is to think of words that belong to the categories listed going down the left and that also begin with the letters listed across the top. For example, if the category were **COLORS** and the letters listed across the top were **R, O, B, P, and G**, your answers might be red, orange, blue, pink, and green. Get the idea? Below are four categories for you to try.

Our answers, which may be different from yours, are listed on page 127.

G P E C B

1. SOUTH AMERICAN COUNTRIES _____
2. BAKERY ITEMS _____
3. FAIRY TALE CHARACTERS _____
4. 6-LETTER WORDS WITH "RA" _____

PRESTO-CHANGO!

By changing **ONE** letter in each word, you can form three new words that are related to each other in some way. Do not change the order of the letters. For example, **FREE, DARK, WEAVES** could be changed to **TREE, BARK, LEAVES**.

Our answers are on page 127.

CROSSWORD
hard**THINKER'S CROSSWORD**

Some logical thinking is needed to solve this crossword. For each "definition," you must figure out the relationship between the first pair of words; then, by applying that same relationship to the second pair, identify the missing word and enter it into the diagram. Be careful: More than one word might fit the relationship. The crossing words will let you know if you are on the right track. For example: Hard: soft; left: RIGHT.

Solution is on page 119.

**23****CROSSWORD**
hard**ADD-A-FRACTION**
CROSSWORD

The definitions in this puzzle have an added twist: They are based on adding together fractions of the defined words to arrive at the word that you will enter into the diagram. Each defined word is preceded by a fraction: The second number indicates the total number of letters in the defined word, while the first number of the fraction indicates the number of letters from that word that is used in the word that goes into the diagram. If there are two or more fractions in a definition, add the second group of letters to the first, in order, to arrive at your answer. If there is only one fraction it will yield the entire answer word. For example, 5-Across's definition is "3/4 talon + 2/3 health resort." The words defined are **CLAW** and **SPA**, so the word to be entered is **CLASP**. **NOTE:** In this puzzle, some of the answers may be 2-word entries, slang, abbreviations, or suffixes.

The list of defined words is on page 127.

Solution is on page 120.

SQUARE LOGIC

by Linda Thistle

Each letter in the diagram below stands for a number from 1 through 25. Using the seven clues, can you deduce the number represented by each letter? As you can read in clue 2, when all the numbers have been correctly entered into the diagram, it will be a magic number square. As each number from 1 through 25 is used only once (see clue 1), you will find it helpful to cross out each number as you place it in the diagram.

Solution is on page 129.

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25

CLUES

- Only the whole numbers from 1 to 25 are used. Each number is used only once, and all 25 numbers are used.
- The five numbers in each row across, each column down, and each of the two diagonals add up to 65.
- The four corner squares, A, E, U, Y, and the center square, M, also add up to 65.
- The squares C, J, O, U, and X contain numbers smaller than 6.
- A is one-half of S and one-third of W.
- C is one-third of R and one-fourth of T.
- P is one-half of G, one-third of V, and one-fourth of K.

for breakfast?

In Cryptograms, you are given sentences in which one set of letters is substituted for another. The words are in their right order, with a space after each. For example, THE WHITE DOG might be written as RNS LNGRS MPI, R being used for T, N for H, S for E, etc. You can break each code by watching for the frequency of certain letters or the way they are grouped. You know that a single letter is usually A or I, that the word THE occurs very often in our language, as does AND. Try IS, IT, OF, and other common words when you find a group of two letters. Each Cryptogram is in a different code. You'll find the answers on page 125.

LOGIC PROBLEM 2

VERDANT SLOPES

by Mary Marks Cezus

Located on the highest hill in its area, the new housing development of Skyland Hill is characterized by its scenic views and cool breezes. Living on a hillside does have its downsides, however. The slope is so steep in places that an ordinary lawn would be very hard to mow. The five people living in the houses on the highest and steepest part of the hill have come up with a great solution. Each (including Joel) recently planted a different kind of ground cover, thus avoiding the need to mow at all! No two used the same ground cover. From this information and the clues below, can you determine each resident's full name (one last name is Shreve), ground cover (one was lily turf), and house number (204, 206, 208, 210, and 212, left to right, as in the illustration below)?

1. The person who planted the bearberry (who isn't Laird) lives to the left of Anita (who didn't plant the sedum).
2. Petrie didn't plant the bugleweed.
3. Anita lives higher on the hill but has a lower house number than the person who planted the pachysandra.
4. Mary lives to the left of the person who planted the sedum (who isn't York).
5. Herman (whose last name isn't Epstein) lives higher on the hill than Laird (who isn't Bruce) and to the right of the person who planted the bugleweed (who isn't Epstein).
6. The person who planted the pachysandra lives to the left of York.

Solution is on page 130.

Directions on how to use the solving chart are on page 47.

ANACROSTIC 1

by Jacqueline E. Mathews

Your finished Anacrostic will be a quotation which you will have written in the diagram on the opposite page. It will read from left to right, and you will see that there is a black square only at the end of a word. Here's how to go about solving:

Step One: Fill in as many of the words in the WORDS column as you can, using the DEFINITIONS at the left.

Step Two: Transfer the letters from the WORDS column to the diagram.

Step Three: Now you can work back from the diagram to the WORDS list. The letters next to the numbers in the diagram correspond to the lettered definitions. You will find many clues: T-E in the diagram is often THE, so you may try that H in the WORDS list. Short words like OF, TO, AND, and word endings like -ED and -ING give other clues for the WORDS list. One more help: The initial letters of the words in the WORDS column spell out the name of the author and the work quoted. Puzzle 1 has been started for you.

Quotations are on page 128.

Word lists are on page 126.

SPELLING SHADE-IN

In the following list, check off all the words that you believe are spelled incorrectly. Then shade in the correspondingly numbered squares in the diagram. If all your answers are correct, the unshaded squares will form the initials of a well-known fashion designer.

Solution and correct spellings are on page 127.

SPELLATHON

The idea of Spellathon is to form as many 5-letter words as you can by moving along the connecting lines from one letter to another in the diagram below. Do not skip letters. You may come back to a letter and use it more than once in the same word (as in "rotor"); but do not stand on a letter, using it twice in direct succession (as in "tooth"). Words beginning with a capital letter, contractions, and plurals are not allowed, and neither are hyphenated, obsolete, slang, poetic, archaic, foreign, and dialect words.

Our list of 29 5-letter words is on page 127.

CROSSITS

In the puzzles below, place the given consonants into the empty squares of the diagrams in such a way that everyday English words are formed reading from top to bottom in both diagonal directions. The vowels have already been placed in the diagrams for you.

Solutions are on page 129.

1. B C F H L M N S W Y 2. B C D M N P R S T Y

CROSS SUMS

The numbers in the black squares in this puzzle refer to the sums of the digits to be filled into the empty spaces. The number below a diagonal line is the sum of the numbers below it. The number above a diagonal line is the sum of the numbers to the right of it. Place one digit (1 to 9, no zeros) in each square.

IMPORTANT: No digit is used more than once in any particular digit combination. We have outlined one area in the diagram. If you need help starting the puzzle, the digit combination for that area is listed on page 130. Solution is on page 122.

TRIPLE CROSS

Here is a challenging puzzle for you to solve! Below you are given 27 letters and three diagrams. For each diagram, select nine of the given letters and place them into the blank spaces in such a way that six everyday 5-letter words are formed reading across and down, crossword style. You may use each given letter only once, so it is a good idea to cross off each letter as you use it. And here's the real challenge: After you have filled in each diagram, anagram those nine letters you've added to form one 9-letter word.

Solution is on page 129.

ANGLEWORDS

In solving Anglewords, you are to form words of a given number of letters using only the letters in the diagram below in an alternating manner. To form each word, choose as the first letter one of the three letters outside the triangle. The second letter can be any of the letters inside the triangle; but the third letter has to again be one of the letters outside of the triangle. Continue moving in and out of the triangle alternately until you have formed a word of the given length. Although the letters outside the triangle may be used as often as needed, each letter inside the triangle may be used only once. It is helpful, therefore, to cross off each letter inside the triangle as you use it. Dashes are provided for each word.

Our answer is on page 127.

SOLICROSS

Trademark

In this game of word solitaire, gain the highest score possible by forming words from your LETTER LIST, placing them in the DIAGRAM so that the words are formed both across (always from the left) and down (always from the top).

1. Write the first seven letters from the LETTER LIST on the first line of the DRAW COLUMN.
2. Form a common English word (no proper nouns) using two or more of these letters.
3. Place the word across or down in the DIAGRAM, either starting or ending in the square indicated by a circle. Do not place letters on any blacked-out squares. Add up the score (see 7 below) and enter it into the SCORE column. In the DRAW column, cross off the letters you used.
4. Copy all unused letters of the DRAW onto the next line, and add enough letters from the LETTER LIST (in sequence) to bring the DRAW up to seven letters.
5. For each DRAW, use some or all of the seven letters to form a new word in the diagram, by either adding one or more letters to an existing word, or setting a new word at right angles to an existing word (either incorporating one of its letters or adding to it), or placing your new word parallel to an existing word (so that the adjoining letters also form words).
6. All letters used in any one DRAW must be used in only one row, either across or down. Only complete words may be formed. Letters adjoining other letters must always form a word, in crossword form.
7. Write your DRAW score in the SCORE column each time you complete one DRAW by adding together all the numbers in the corners of the squares used to form or modify words. If a word has been changed by adding a letter or letters (such as adding "s," "ed," "re," etc.), count the entire word again toward your score. Two or more words formed at the same time are both counted; the square common to both new words is counted with each word. Words within words are not counted.
8. If you cannot use any letters from a given DRAW, cross off all seven letters and subtract 25 points from your score for that DRAW. Bring down the next seven letters from the LETTER LIST and try to form your next word.
9. When the DRAW column is complete, the game is finished, whether or not all the letters from the LETTER LIST have been used. If all the letters in the LETTER LIST have been transferred to the DRAW column, you may continue to form words through the final DRAW, transferring any unused letters to the remaining lines of the DRAW column. If at any time, all the letters from the LETTER LIST are used up to form words, add 50 points to your score and count the game as complete. Your final score is calculated by adding up all the points in the SCORE column.
10. When you **finish** the puzzle, the same word must not appear twice in the diagram.

When you have completed the game, you may play it again by making your own diagram and reversing the order of the letter list.

BOWL-A-SCORE CHALLENGER

In our bowling game, a strike (worth 20 points) is made by using all the letters in a group to form a 10-letter word. The first letter of each strike is shown. A spare (worth 10 points) is made by using all the letters to form two words. A spare may not be formed by splitting the strike word in two (for example, the strike word "FORECASTER" cannot be split into the spare "FORE" and "CASTER"). Proper nouns may not be used. A perfect score is 300 points.

The words we formed are on page 127.

SPELL TO SCORE

by Henry Kroger

Fill in as many blanks as you can to form 11 different words starting with the given letters. Proper nouns, plurals, and present-tense verbs ending in "s" (such as "rings") are not allowed. No letter may be repeated in the word itself or in the word above or the word below. For each word, the number of letters needed to earn the maximum score is indicated by the number of blanks.

In this sample, the word ROCKY cannot be ROAST because the letters A, S, and T appear above in STAPLE. Likewise, PLATED cannot be PATROL because of the O and R in ROCKY.

STAPLE 6
ROCKY 5
PLATED 6

TO SCORE: Each letter you use is worth one point. Give yourself a bonus of 11 points if you use all 26 letters of the alphabet. Include the given letters in your score. Subtract 5 points from your score for every word you form of less than 4 letters.

HI-SCORE

by Henry Kroger

Using only the ten letters shown, fill in the diagram by forming words across and down to achieve the highest possible score. Each letter has a given value, so try to use the high-value letters as often as possible. You may repeat letters as often as you wish, even within words. Do not repeat words in the diagram. Foreign and hyphenated words, abbreviations, slang, plurals, and words starting with capital letters are not allowed.

When all the boxes in the diagram have been filled in, add up your score. Count each letter, line by line, going across only. Put the total for each line in the boxes at the right.

Our solution, with a score of 286, is on page 129.

CRYPTOGRAMS

1. Don't think that folks will judge your generosity by the amount of advice you may be willing to give away.
2. There's no such thing as a bad child. It's merely that some youngsters are better behaved than others.
3. A good book is like a little garden carried in one's pocket.
4. It happens all the time; those golden opportunities that seem too good to be true, are.
5. How are we going to discover new worlds if we are afraid even to lose sight of the shore?
6. Those who come to terms with life gain lasting contentment.
7. I really like long walks, especially when they are being taken by persons who annoy me.
8. Those who cannot remember the past will spend a lot of time looking for their cars in mall parking lots.
9. Some women's shopping trips for a last-minute gift for their husbands always end up in a tie.
10. Soups are commonly sipped during the entire meal in China.
11. Advice is very much like snow; the softer it falls, the longer it dwells upon and the deeper it sinks into the mind.
12. Librarian's motto: Knowing all the answers might not be as important as knowing where to look them up!
13. Use your head to handle yourself, and use your heart to handle others.
14. Some are dissatisfied with what they have; some don't know why others are satisfied with what they haven't.
15. Most money talks, but my credit card uses sign language.
16. If a mighty tyrant reigns, he often storms.
17. Our English word "trout" comes from the Latin term which means "greedy fish."
18. Pleasant winter climate makes Acapulco a superior resort area.
19. Every great goof has a halfway moment, a split second when it can be recalled and perhaps even remedied.
20. Professor Albert Einstein said, "Only two things will be infinite, the universe and stupidity."
21. Diligent student masters complicated computer maze.

LOGIC PROBLEM 1

Friday's ghost wasn't Betsy (clue 2), Walt (clue 3), Carl (clue 4), or Sara (clue 5); it was Meg. Since Meg didn't speak (clue 2), run through objects (clue 4), or glow or float (clue 6), she disappeared. By clue 6, Meg was seen by a boy. He isn't Nigel (clue 1) or Terry (clue 3), so he's Lon. Meg didn't appear in the classroom (clue 1), the attic (clue 2), the library (clue 5), or the hall (clue 6); she appeared in the storeroom. By clue 4, then, Wednesday's ghost ran through objects and Carl appeared on Thursday. Since Walt didn't appear on Tuesday (clue 1) or Wednesday (clue 3), he appeared on Monday. By clue 3, Terry saw Tuesday's ghost and Wednesday's ghost appeared in the attic. The ghost in the library didn't appear on Tuesday or Thursday (clue 5), so it appeared on Monday. By clue 5, Tuesday's ghost glowed and Sara appeared on Wednesday. By elimination, Betsy appeared on Tuesday. By clue 1, Nigel didn't see Walt or Carl; he saw Sara. Betsy appeared in the classroom (clue 1). By elimination, Carl appeared in the hall. Walter didn't float (clue 3), so he spoke. By elimination, Carl floated. By clue 2, Hermia didn't see Walt; Jo did. By elimination, Hermia saw Carl. In summary:

Hermia, Carl, hall, floated, Thursday
Jo, Walt, library, spoke, Monday
Lon, Meg, storeroom, disappeared, Friday
Nigel, Sara, attic, ran through objects, Wednesday
Terry, Betsy, classroom, glowed, Tuesday

LOGIC PROBLEM 2

The person who planted pachysandra lives to the right of and lower on the hill than Anita (clue 3), and to the left of York (clue 6). Anita, then, lives in 208, the pachysandra was planted at 210, and York lives in 212. The house with the sedum isn't 208 (clue 1), or 204 or 212 (clue 4); it's 206. Also by clue 4, Mary lives in 204. She planted the bearber-

ry (clue 1). Since the bugleweed wasn't planted by York at 212 (clue 5), it was planted by Anita at 208. By elimination, York planted the lily turf. Laird lives lower on the hill than Herman (clue 5), but not at 204 with the bearberry (clue 1). Laird, then, lives at 206 and Herman is at 210. Laird isn't Bruce (clue 5), so he's Joel. By elimination, Bruce is York at 212. Anita isn't Petrie (clue 2) or Epstein (clue 5); she's Shreve. Also by clue 5, since Herman isn't Epstein, he's Petrie. By elimination, Mary is Epstein. In summary:

Anita Shreve, bugleweed, 208
Bruce York, lily turf, 212
Herman Petrie, pachysandra, 210
Joel Laird, sedum, 206
Mary Epstein, bearberry, 204
